PROFESSIONAL PROFILE

Cybersecurity Engineer & Full Stack Developer with a hybrid profile bridging the gap between offensive security and software development. I possess a strong command of **English (C1)**, enabling collaboration in international environments.

My core value lies in my diverse skillset: I combine the analytical mindset of a Blue Teamer (CSIRT/SOC experience) with the building capabilities of a Software Engineer. I am a **builder who thinks like a hacker**, ready for challenges in **AppSec, DevSecOps, or Software Engineering** where I can leverage my coding skills (Java, Python, C, React) to architect robust and secure systems.

TECHNICAL SKILLS

DEVELOPMENT

Java • Python • C
React.js • Next.js
JavaScript • TypeScript
SQL • HTML5/CSS3

CYBERSECURITY

AppSec • Secure Coding
Pentesting • OWASP
Burp Suite • Metasploit
Incident Response

CLOUD & DEVOPS

DevSecOps • Terraform
Docker • Cloudflare
CI/CD • Linux

Languages: Spanish (Native) • English (C1) • French (Basic)

PROFESSIONAL EXPERIENCE

Cybersecurity Engineer (SecOps & DevSecOps) | Centro de Servicios Avanzados (CSA) Jan 2025 - Present

- Security Operations Leadership:** Active role in the SOC, managing critical incidents using **LUCIA** (CCN-CERT) and optimizing SIEM rules to significantly reduce false positives.
- DevSecOps & Automation:** Architected and deployed advanced **Python** automation scripts that slashed incident triage time by 50%, integrating directly with threat intelligence feeds.
- Strategic Compliance:** Led the technical implementation and auditing of security controls under **ENS (National Security Scheme)** and ISO 27001, ensuring compliance for critical public sector administrations.
- Advanced Vulnerability Management:** Conducted rigorous vulnerability assessments and Pentesting campaigns on critical infrastructure, identifying and remediating high-severity vulnerabilities.

KEY PROJECTS

GraphSec-IaC (Orchestration TFG)

PYTHON • GITHUB ACTIONS • TERRAFORM

Advanced security orchestration platform that correlates multiple scanners (Checkov/Trivy) with infrastructure graphs. Features a native Python parser, CI/CD integration, and React frontend.

AI Chatbot Widget (RAG)

CLOUDFLARE WORKERS • REACT • GROQ AI

Serverless RAG system deployed on the Edge. Crawls websites to generate intelligent, context-aware chatbots with milli-second latency.

Secure CI/CD "Golden Pipeline"

GITHUB ACTIONS • GITLEAKS • SEMGREP

Automated pipeline enforcing "Security as Code". Blocks commits with hardcoded secrets or vulnerabilities (SAST) before deployment, ensuring a secure software supply chain.

Patch-BOE (LegalTech)

JAVASCRIPT • PYTHON • OPENAI • SQL

Automated pipeline extracting legislative updates from the Spanish Official Gazette (BOE), summarizing them via LLMs for legal professionals.

Dreizeer Platform

NEXT.JS • VERCEL • SEO

High-performance fitness platform engineered for 100/100 Core Web Vitals. Implemented aggressive Local SEO strategies achieving Top 3 rankings for target keywords.

NativeConnect (Secure Auth)

REACT • PYTHON • OAUTH2

Designed a "Secure-by-Default" SaaS authentication system. Implemented HTTPOnly Cookies and robust input validation to prevent common OWASP vulnerabilities.

EDUCATION

BSc in Cybersecurity Engineering , Universidad Rey Juan Carlos (URJC) 2020 - 2025
